Dear Pastor:

Please allow this letter to introduce myself as a humble servant with a sincere desire to reach the body of Christ with a message of hope and health. I was called out of business and commissioned by the Lord in 1999 to proclaim an alternative, unknown health care practice known as Upper Cervical Care. I have come to believe whole-heartedly that this is from God. This science reinforces the evidence of God breathing the breath of life into Adam, which now abides in our DNA as Innate life force.

Good Christian people have prayed extensively for healing, only to remain unhealthy or get sicker, are over-medicated with drug toxicity, experience medical errors resulting in lost organs or death, and are in debt because of related medical costs.

We have listened to those fortunate enough to have located an Upper Cervical doctor. They share stories of deliverance and newness of life because they no longer suffer from intense pain or hopeless situations. Stories have included finding health from conditions such as:

Migraine headaches	Fibromyalgia	Bed wetting
Ear infections	Autism	Chronic pain
Mienere's Disease	MS, etc.	Fibromyaliga
Shingles	Bell's Palsy	Restless leg syndrome

These and many other diseases have responded to having the head's relationship to the top 2 bones (axis/atlas) gently corrected. This complex correction allows the brain impulses to flow through the brain stem up to the brain, then down to every body part. When the Innate life-force is released to flow correctly, the body God designed heals itself through the life-force within us.

We speak at churches, seminars, civic organizations and colleges, sharing how this science kept me from taking my life after 12 years of debilitating TN facial pain. It's better known as the incurable "suicide disease" in medical journals. I experienced the power of healing when an Upper Cervical doctor corrected my head/atlas, allowing the nerve impulses to communicate correctly, eliminating the painful spasms that had robbed me of a quality life and restricted me to my bedroom for two years. I liken the experience to the concept of the church getting its head (Jesus) on straight, thus allowing the Christian body to come together and function as God intended it to.

This letter is in support of Upper Cervical DC's, who are skilled practitioners of this science. My story, and many others, can be found in my book *what Time, tuesday?. Wondrously Made*, by Jessica Jones shares her story and spiritual analysis to show the relevance of God's city of Jerusalem to our body, while depicting the upper cervical as the "mouth of God" or Ark of the Covenant. Together these books provide a pathway of light to guide suffering saints.

Blessings on you and your work,
Pastor James Tomasi
